# New York Stock Market Salos. Stock

New York, March 14.—For the greater part of to-day's session on the Stock Exchange business was dull and prices irregular, except for manipulation in some of the minor specialties and low priced issues. In the hast lour, however, the market reversed its postion and broadened out under the lead of the speculative favorites, some of which went to a new high level for the present movement, while Amalgamated Copper sold at its highest price in considerably over a year. There was no naws to account for the sudden change of general advance in prices of iron and steel production and encouraging advices dealing with crop conditions.

There were again specific reasons in the total course of the process.

Ing with eron conditions.

There were again specific reasons for the further advance of such stocks as International Harvester, the Coppers and American Smelling. Semi-official statements indicated that Harvester's disintegration will soon be announced, and the copper industry continues to work in the direction of higher prices for the inetal.

Increased strength.

Increased strength in American Telephone and Telegraph, was con-current with reports of a demand for the stock in Paris, where it is listed on the Bourse. Bonds were active, but reflected lit-tle of the stock market's strength ex-cept in Eries. Total sales, par value, 13,408,000. \$3.408.000.
United States government 4's advanced 1-8 per cent on call. Total sales of stocks to-day, 537,500 shares.
